Welcome to the Docker weekly newsletter, a quick look at the latest content published about Docker and the agenda for the upcoming weeks.

Today, we’re thrilled to announce that the creators of Orchard and Fig – two of the most polished and exciting projects to come out of the Docker ecosystem – are joining Docker.

Thank you,
The Docker Team

**Docker Meetup groups**

To find out if there is already a Docker meetup group that exists in your area, please visit [this page](http://example.com).

If you want to create a new Docker meetup in your city, we will be happy to help: [follow the guide](http://example.com).

Docker is always looking for new venues to host meetups. If your company is willing to host a meetup or workshop, please contact us at [meetup@docker.com](mailto:meetup@docker.com)

**Docker Job openings**

Do you want to get involved in an exciting open source project? Are you already using Docker and contributing to the project on Github? Are you convinced that Docker containers are the future of lightweight virtualization and easy application deployment? Then join our engineering team! Follow [this link](http://example.com) to find out about our job openings.
